BASSANO, ALBERTA, THURSDAY, July 21, 1927

BIG SPORTS PROGRAM AT GEM, WED., JULY 27

Good King of Princes Offered in Racing and Stomped Events—Program Topped by Children's Sports, Cornual and Other Features

Next Wednesday, July 27th, is the day of the Gem's big sports program. For several weeks preparations have been in progress to put on a real program, that will be the biggest day of sports, entertainment and amusement ever held at Gem.

A big feature of the day's program is the 1000 ft horse racing events, with a prize list amounting to more than \$100. In the free-for-all race alone there is \$25 prize money, and several owners of fast horses are expected to figure in the prize money.

Besides the free-for-all, there is a men's saddle horse race, relay race, cowboy's the novelty race, boys' pony race, equus pony race, and Indian pony race. This is a fine program of horse racing, and is sure to draw a big crowd of spectators.

The stamper events will include a bucking contest, rider riding, calf roping, and boys' calf riding.

In the morning, starting at 10 a. m., a program of children's sports will be run off. They will consist of running, jumping, and novelty events for boys and girls.

The carnival will be in operation during the afternoon and evening. Refreshments will be served on the grounds.

The day's entertainment will wind up with a big dance at night, with the Bassano orchestra in attendance.

Pete LeGrandeur and Jap Fryberger, are the stamper managers, and they plan on giving a real show. Ben Gray is general manager, and L. C. Vilec is secretary-treasurer. Any one wishing further information with regard to the rodeo and sports should get in touch with any of these men.

GEM, JULY 20.—Pete LeGrandeur returned to the Colony on Wednesday. Mrs. LeGrandeur has been spending a short holiday with relatives in U. S. C.

Many Gemites attended the Circus and have reported an excellent time in more ways than one.

Gem rodeo Committee have their hands full these days, preparing chutes, corals and a thousand other things, to be in readiness for their big sports day on Wednesday next. Don't forget the date JULY 27th. A hearty welcome awaits all visitors.

Mr. and Mrs. John Rorer are expected home from B. C. during the week.

Mrs. Rumble entertained 11, Schriber and family to Sunday dinner.

Mrs. Pollock and family and a few friends dined in the Clarys district on Sunday last.

Misses B. Spitzberg and L. Pollock are enjoying a holiday in Clarys, the guests of a Calgary school chum.

Mrs. Rolfe left for the States last week.

TREE PLANTING CAR IS COMING TO BASSANO

Making Eighth Annual Tour in the Western Provinces

The tree planting car, under the direction of the Canadian Forestry Association, is coming to Bassano on Saturday of this week, July 22.

The object of the tree planting car is to encourage the planting of trees as windbreaks, to prevent soil drifting, to moderate the wind damage to grain crops, to help conserve moisture, and to beautify farm surroundings.

Tree talks by George West, a well known tree planting authority, will be given, and in the evening a motion picture lecture will be given. No admission fee or charge of any kind is made.

The tree planting car is sent to the various communities throughout the west by the Canadian Forestry Association through the courtesy of the railway companies, and a group of subscribers who defray a considerable part of the expenses.

Mr. Smith of Rosemary brought Mr. and Mrs. Goss and children and Mr. and Mrs. Held and family took in the picture show at the Gem on Saturday evening.

RAIN DRENCHES BASSANO CROPS

Yesterday's Storm Contained Little Heat But No Damage Reported

A sudden and violent storm swept over the Bassano district last Tuesday evening. The grain fields were drenched in a heavy downpour that began about 3.30, and lasted more than an hour. The rainfall was very heavy and measured 1.5 inches on the rain gauge at the Dam. Gem was on the outskirts of the storm, only 1 inch being recorded there.

The rain was accompanied by a little hail but no damage to crops was reported. In some fields the grain was lodged by the weight of the rain and the driving wind, but it is expected the loss in this way will be small.

The lodged grain is still young and green, and it is expected some of it will straighten out again. The storm came up from the west and reached Bassano about 3.30 when the Gemity Bros. circus performance was in full swing.

Wonderful Wheat Crops To Be Seen At Hussar

Wheat is Three Feet High and Heading Out—Heavy Yields Are Expected Heavy Wind Does Some Damage to Windrows and Granaries

The farmers of Hussar are getting ready to harvest a bumper crop. Prospects are excellent for a heavy yield of wheat this year, and early signs indicate that few records for yield may be set up. The wheat is coming along with a remarkable growth. Many fields now stand three or more feet high, and are as green as grass, and the stands of grain are very thick.

The windstorm which recently visited the district did some damage to windrows, and blew over a number of granaries.

A. C. Clifton and family left last Sunday on a motor trip to Minnesota. They expect to be gone about two months.

Mr. and Mrs. Larsen, Mrs. Hoyt and Mrs. Larson went to the Calgary stamper last week.

H. J. Bell is moving his family to Hussar, and will reside in the Service house.

Rev. Mr. McNeill and family left last week for Ireland. Mr. Bartlett will take his place in Hussar. Church service will be held in the Community Hall next Sunday evening at 7.30.

Miss Eleanor Moffatt was the guest of Miss Irene Johnston in Bassano last week.

Mr. and Mrs. F. Webster and Mrs. Leman, of San Diego, California, and Mrs. H. Townsend of Montana, and Mrs. Mitchell, of Medicine Hat, were the guests of Mrs. E. LeGrandeur during the past week.

Miss Mariel Beira, who has been teaching in Saskatchewan, has returned to her home in Hussar.

E. LeGrandeur and Tom Lawson are at present at the Calgary stamper.

Mr. Hurdless and Gouline are building an addition to the garage they purchased from Mr. Clark this spring.

The independent elevator is being torn down, and will be rebuilt with a capacity twice that of its original.

Mr. Randall, manager of this elevator, is spending his vacation with his family.

There has been a large attendance at the moving picture show held in the hall every Saturday night. "Behind the Front" is the picture showing next Saturday, July 22nd.

The public works department of the town is preparing to lay a concrete macadam from the corner of McKee's store south as far as the lane. It is planned to fill in the foundation south of the lane, and complete the walk to the station next year.

THE BASSANO MAIL
Wallace J. Smith
Editor and Publisher
Subscription \$2.00 a year, \$2.50 to the United States

The earlier has just found his place in the sun after nineteen centuries of obscurity.

Calgary has a dog problem that is causing a lot of backing by both dog owners and non-owners. Some say "it's a dog-gone shame," and others say "it's a dog-gone nuisance," and between the two, poor Bruno is living a dog's life of it.

Some of those American tourists complete a lot of the bad roads, but we never hear any of them kick about the road that leads to the government liquor store.

The mosquitoes are now having their innings. The flying ants are due to hop off any day now.

The circus has come and gone. Everybody seemed to have a good time, particularly the circus people. It cost some of the boys a little more than they expected, but it is only once in a while they get a chance to see a circus, and they may as well spend their money freely when it does come. Some of the boys complain that the circus people are not very accurate at counting money. One thing about the circus, there has nobody actually held up with a six shooter.

THE CROP

Wheat is coming along in splendid style in the Bassano district. The growing season has been one of the best in the history of this part of the province. There has been an abundance of moisture and enough warm weather and sunshine to make for rapid and prolific growth.

So far there has been no hail loss to the crops in the vicinity of Bassano. While some parts of the province have been visited by severe and damaging hail storms, the farmers here have been fortunate in escaping this loss up to the present.

The hail season is not yet over, in fact it never over until the grain is threshed. Every dark cloud that comes this way is anxiously watched for sign of hail and there is always a sign of relief when the danger passes.

When the big crop is harvested, when the grain is threshed and delivered to the elevator, then, and then only, can the farmer feel safe from the ravage of the weather.

Field Crop Competitions Popular

Great interest is being shown in the Alberta Field Crops Competition, the annual event sponsored by the Provincial Department of Agriculture in co-operation with various Boards of Trade throughout the province. The following towns have already entered the competition: Big Valley, Collins, Bangard, Stettler, Leduc, Athabasca, Hanna, Lethbridge, Oils, Tebel, Okotoks, Innisfail, Camrose, Raymond, Sedgewick, and Strathmore.

The Edmonton Board of Trade will award a silver cup to the winner in the Edmonton district and it is expected that other Boards of Trade will do the same in their own localities. Those who carry off prizes in the competition will be asked to exhibit at the provincial seed fair.

FOUND—A ladies small vanity case containing purse with a small sum of money. Found at the sports day dance last Friday, July 8th. Owner may redeem same by applying at The Mail office and paying for this advt.

Buffalo Doing Well In North
The buffalo which have been transferred north from the park at Wainwright to the reserve in the vicinity of Fort Vermilion "wintered well in their new home" as there are few wolves on the range and feed was abundant, according to Ranger Milne of Fitzgerald, who has come out to accompany a further shipment of buffalo northward.

About 750 buffalo still remain to be transferred out of the 2000 scheduled to go north from Wainwright this season. Little difficulty is being experienced in the movement and the animals soon settle down on their new range.

"CLEON AND I"

'Here is another song which shows the folly of riches, the wonder to be found in simple things. After reading it, one is certain that happiness is not found in palace halls; that the truest way to peace of mind lies through the possession of as little as possible. In our rampant and self-sufficient youth we can laugh at such statements, counting them as a bit ridiculous; grows older and wiser, we see their underlying truth. "Enough is as good as a feast." But how long does it take to realize that? Somebody once said that life is nothing but discovering the truth of platitude, and no wiser words were ever uttered.

—Charles Mackay.
Cleon hath a million acres, ne'er a one have I;
Cleon dwelleth in a palace, in a cottage I;
Cleon hath a dozen fortunes, not a penny I;
Yet the poorest of the wain is Cleon, and not I.

Cleon, true, possesseth acres, but the wainman is I;
Half the charms to me it yieldeth money cannot buy.
Cleon labors alogh and dullness, fretting vigor I;
He is velvet, I in fustian, richer man am I.

Cleon is a slave to grandeur, free as thought am I;
Cleon fees a score of doctors, need of none have I;
Wealth surrounds him - envied - death, Cleon fears to die;
Death may come, he'll find me ready - happier man am I.

Cleon sees no charms in nature, in a daisy I;
Cleon hears no anthems ringing in the sea and sky.
Nature sings to me my fervor, earnest listener I;
State for state, with all attendants, whom would change? Not I.

A SCOTS VERSION

A wee fond lambkin Mary had,
In fiesce a snawdrift pure,
An' thee said that Mary said,
There gae the lamb demure,
An' faithfu' to her likka' step
The Dame School's portal passes,
Sye monnae, "s'ir skip, a stool!"
Loud laugh the bonny lassie!
The Dame, altho' wi' twinklin' e'e
Mann turn the chiel outbye—
Whaur bides hee close, a royal avail
That leavie, nor reasona' why.

SUNSET IN THE WEST

The beauty of the sunset fills the sky.
"The day has gone
Mid blue, and gold, and crimson
hues, the night creeps on;
I see the hand of God in every passing scene;
I feel, and know, that in some distant clime
Beyond the beauty of the blue and
Scey clouds,
The touch of one divine.
The master hand of art, to us revealed by one unseen;
The beautiful coloring, shades and light, we marvel most
The charming scenes mid yonder setting sun
That sink in beauty in the Western sky.
And to him the night we feel the Master's touch
Come from on high.
—F. N. MacGregor

Soll Scientists Visit Alberta.
Delegates to the number of 200 representing some 40 countries on their way from the First International Congress of Soil Science at Washington, D. C., spent two days in Alberta in the course of a tour through the United States and Western Canada. Tuesday was spent at Jasper National Park and on Wednesday they were entertained at Edmonton by the Board of Trade, the University of Alberta and the Provincial Government. The visitors were greatly impressed by the fertility of Alberta soil as indicated by the splendid crops seen during the day in the surrounding country.

Buffalo Doing Well In North
The buffalo which have been transferred north from the park at Wainwright to the reserve in the vicinity of Fort Vermilion "wintered well in their new home" as there are few wolves on the range and feed was abundant, according to Ranger Milne of Fitzgerald, who has come out to accompany a further shipment of buffalo northward.

About 750 buffalo still remain to be transferred out of the 2000 scheduled to go north from Wainwright this season. Little difficulty is being experienced in the movement and the animals soon settle down on their new range.

HAWITS OF WIRE WORM EXPLAINED

Life History of Wire Worm and How to Combat This Pest

Following reports from a number of isolated districts in the province that wireworms have made their appearance in grain fields, investigations have been made by Field Crops Commissioner W. J. Stephens. While the occurrence of these pests is not at all general, the following article by Prof. R. H. Strickland, Entomologist at the University of Alberta, will be of value to farmers in locating their presence in suspected.

Cultural Methods for Reducing Wire Worm Damage

Every spring we receive requests for information regarding the control of wireworms which are destroying recently sown grain. The majority of farmers who are troubled with these pests are looking for some material with which they can treat their grain either to make it distasteful to wireworms or else to poison those that feed on it.

A great variety of materials have been advocated from time to time for these purposes. Nothing has, however, been found that has an appreciable effect in either direction. Turpentine, oil, lime, Paris green, tar, copper carbonate and a host of other materials have all proved ineffective when tested under experimental conditions. The solution of the problem, then, does not appear to lie in the direction of seed treatment; therefore we must look elsewhere for methods of reducing wireworm damage. In order to do so, we must first have a general knowledge of the habits of our most destructive wireworms.

The History and Habits of Grain-Eating Wireworms

The wireworm is the grub of a small beetle. In April the beetle comes above ground and wanders around till early in June when they burrow to a depth of about five inches and there lay about 200 very small eggs. If conditions are satisfactory for these eggs, from each will hatch a minute wireworm about a month after they have been laid. These wireworms take four or five years to become full-grown, when they will be an inch long. During the first spring after a wireworm is hatched, it is too small to cause appreciable damage. Even when it is two years old, it is only a inch long and has not developed a very big appetite. A three year old wireworm is a inch long and it then begins to do serious damage to newly sown seeds. We must remember always,

when we observe wireworm damage, that the wireworms that are causing the damage have been in the field for at least three years. Their presence in destructive numbers is never due to the way the field was handled during the year that immediately preceded the one in which the damage is seen.

Wireworms feed only during the spring and fall. After about the end of the first week in June, in a normal season, they burrow rather deeply into the soil and remain inactive until towards the end of August. When, finally, the wireworm is full grown it comes to within about four inches of the surface of the soil and there changes into a very delicate white pupa (the "chrysalis" stage). All mature wireworms are in the pupal stage during the first half of July. Early in August the pupa turns into a beetle which remains below ground until the following April when it comes to the surface, to wander around till June when it once more burrows into the soil in order to lay its eggs.

Every wireworm is an infested field has come from an egg that was laid one or more years previously by a beetle, and every one, if it survives will ultimately turn into a beetle. At what stages in their development have we the best opportunity of destroying them?

THE BEETLE. There appears to be no practical method for destroying these. Late fall ploughing does not damage them and they cannot be killed in the spring. THE EGGS. If these are not laid to a greater depth than about 2 inches below the surface of the soil they are almost certain to be dried out and destroyed. That is the reason why the beetle burrows to 5 inches, if she can, before laying her eggs. We find, however, that the beetle cannot burrow into fairly firm earth and that when the soil is too hard for her, she will lay her eggs just beneath the surface. In normal years all of these shallowly laid eggs dry out and perish.

Our experiments indicate that in most of the types of soil that occur in Alberta, beetles cannot burrow into the soil that has not been disturbed since the previous fall. Deep ploughing in May and early June allows the beetles to burrow readily to five inches deep before laying their eggs and at this depth, all are certain to hatch.

THE ADULTS. In which wireworm damage is increasing, we would recommend a modified method of summer-fallowing, which we will explain later.

THE WIREWORMS. We have seen that poisoning wireworms does not appear practical. We find also that

half-grown wireworms cannot be starved. They can live for at least two years in damp soil in which nothing is growing.

The only method we know for reducing their numbers is by constant cultivation in order to expose them to the birds.

THE PUPA. As we have already stated, the pupa is very delicate and is rarely more than four inches deep in the soil. All full-grown wireworms turn into pupa in the last half of July, and the pupae turn into beetles early in August. Pupae are very easily killed by ploughing or deep cultivation.

METHOD OF SUMMER-FALLOWING. From this it is seen that the most satisfactory times to attempt to destroy wireworms are when they are in the egg and in the pupal stage. We would recommend that the following cultural measures be tried out for their destruction. They are found most often in timothy and clover fields.

(1) Avoid deep spring ploughing as much as possible. Where this is necessary, such as after ploughing.

(2) Summer-fallowing. Until the middle of July, cultivate the surface of the soil to a depth of not more than 2 to 3 inches, as often as is necessary in order to destroy weed growth. The beetles will thus be forced to lay their eggs in this shallowly worked soil and most of them will perish.

During the latter half of July, plough to a depth of six inches to destroy all of the pupae and thus rid the field of the beetles that will during the following year.

(3) When seeding wheat, in fields in which wireworms are known to be present in destructive numbers, seed rather more heavily than is otherwise desirable.

(4) Do not seed wheat any more deeply than is necessary to assure good germination.

(5) Seed oats or flax in preference to wheat in badly infested fields.

(6) Pack at right angles to the drill rows, with a heavy ridged packer immediately after seeding.

"And so you are the lady who is giving my little pointer a lesson?"

"Well I find her very apt, to say the least."

"That funny, I always found her very apt to say the most."

G. S. Warren was a visitor to the Calgary stampede last week.

Mrs. W. H. McLeas, of Calgary, is the guest of her son, Wm. McLeas.

Mrs. Agate went to Grants for a week's visit.

Mr. and Mrs. E. C. Small were in town from Glen on Monday.

Mrs. H. S. Johnson left on Friday afternoon for Calgary.

Mr. and Mrs. B. F. Graham, of Chazy, were in Bassano Monday.

West Smith went up to the Calgary stampede last Saturday.

L. W. Agos drove through from Wainsting with one of the new Brooks steam cars.

Miss Irene Johnston has accepted a position as teacher at the Latham school.

Preparations are being made to build a concrete sidewalk from McKee's corner south to the base.

There are some beautiful flower and vegetable gardens in Bassano this summer.

Mr. and Mrs. H. F. McDonald and children motored up to the Strathmore stampede on Wednesday.

Donald Agate is spending part of the holidays at the Alex Culbertson ranch.

R. C. Service will be held in Bassano next Sunday, July 26th, at 11:30 a.m.

Miss Mary Wright, of Rosnoke, Virginia, is visiting with her sister, Mrs. Hux Johnston, for a few weeks.

Geo. H. Travis was a visitor to Calgary this week, attending a meeting of the Past Masters Association.

Mr. and Mrs. Wm. McLeas and family motored to Calgary on Saturday for the stampede.

Mrs. J. Allen and Mrs. Jas. Stinson left last Sunday for Edmonton for a week's vacation.

E. P. Currie was a visitor to Calgary last week-end, going up Friday evening.

D. J. Guyatt, of Crowfoot, left this week with Mrs. Guyatt and children for Pittsburgh on an extended visit.

Dr. W. P. Keith, A. G. Bond, and W. J. Blankenship drove to Calgary last Saturday.

Misses Irene and Nina Binnion, of Calgary, were the guests of Mr. and Mrs. W. J. Redmond for the past week.

Mr. and Mrs. Praxnell and family drove out to Hutton to visit at the Bradshaw home. Mrs. A. Bradshaw returning with them for a short visit with her sister, Mrs. J. Rathbone.

Mrs. R. Jinks and daughter Kathleen, sister-in-law and niece of Mrs. Rathbone, passed through Bassano on Monday night's train for a long visit to the old country.

T. Stubbs, one of the old timers of this district, now raising horses in May and early June allows the beetles to burrow readily to five inches deep before laying their eggs and at this depth, all are certain to hatch.

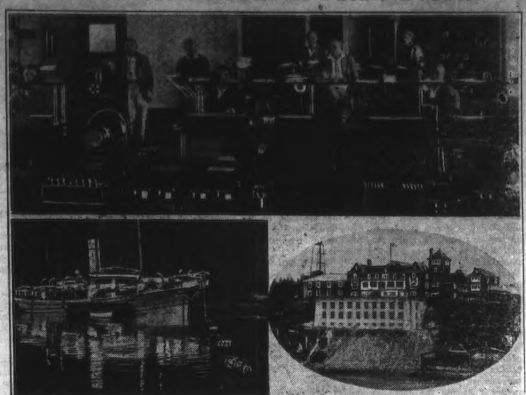

Mr. and Mrs. W. S. Weir and children spent last week partly at the Calgary stampede, and also driving as far as Crowfoot, in the Kootenay Valley, B. C.

Sixteen-outlets were camped in the Bassano auto camp Tuesday night. Some of them waited till late Wednesday morning to be the roads dry up before packing out.

Mr. and Mrs. W. E. Sambrook left Wednesday morning for Banff for a vacation. While there Mr. Sambrook will take part in the provincial trap shooting competition.

Walter Ross, of Calgary, is spending a holiday with his sister Mrs. Chas. Wilson.

All-Red Cable Route via Pacific Doubled

Upper—The operating room cable station, Banfield, B.C. Lower left—Laying cable between Banfield and Port Arif, showing the cable fleet. Lower right—Cable station at Banfield, B.C.

With the laying of a 70-mile stretch of cable between Banfield and Albert, B.C., by the cable ship "Restorer," under charter by the Canadian Pacific Telegraphs, the all-red line Pacific cable service was doubled. The new line is another Canadian Pacific link between Canada, Australia and New Zealand.

The Pacific Cable Board, representative of British, Canadian, Australian and New Zealand governments, laid the cable from Australia to Banfield, on Vancouver Island, and the line that connects the distant ends of the Empire stretches across Canada to Halifax and from there to the heart of the Empire. This is the second all-copper line that has been built by the Canadian Pacific and leased to the Pacific Cable Board.

The last stretch of cable was shipped from England via the Panama Canal some time ago, when it was deemed necessary to cope with the increasing cable business. The cable was in two sections, weighed over 250 tons and was officially inspected and O.K'd by J. McMillan, general manager of Canadian Pacific Telegraphs, who journeyed to England for that purpose.

The accompanying illustrations were taken during the recent operations. One of the photographs shows the trip ship "Restorer" lying near the wooded shores of the island. Off the starboard side and extending into the foreground of the picture can be seen a line of barrels which floats the cable until the time comes to lower that section to the bottom. A short later settlement has sprung up at Banfield around the cable station, part of which, with the station, is seen in a view taken from the "Restorer."

WORLD HAPPENINGS
BRIEFLY TOLD

I.L.R.I. The Prince of Wales will visit Vancouver and Victoria after August 10.

The population of Baltimore, as shown by the official city census figures was published today, is 67,683, an increase of 1,839 over the Dominion Government total of 65,844.

An increase in wages and adjustment of working rules is sought by Canadian National telegraph employees, who started negotiations with the management through the international union representatives.

The New York Herald-Tribune says that Colonel R. H. Ross, former officer of the Lafayette Escadrille and World War ace, announced that he would attempt a flight to Paris and return in 14 hours. The trip will be made in September, he said.

It is possible that Australia's 1931 exhibition may be of a British Empire character. There is a suggestion that the King may be invited to open it, but, as His Majesty is unlikely to go, the Prince of Wales will be invited to perform the ceremonial.

Homeosted entries for the first five months of the present year in the four western provinces total 2,581, as against 2,331 for the corresponding five months of last year. Saskatchewan heads the list with 1,038 entries, followed by Alberta with 712, Manitoba with 273, and British Columbia with 57.

Rt. Hon. Ramsey MacDonald, leader of the Labor party in the United Kingdom, will not accompany Hon. Charles Dunning and party to the Hudson Bay this summer. Mr. Dunning is as yet undecided as to whether for this trip he has not yet heard from Frederick Palmer, the port engineer, will reach the capital.

Twenty-five thousand crates sent by the Canadian Government for free distribution in England, arrived in Liverpool on the liner, *Albion*. A staff of girls sent by a London committee have been sent to the liner, immediately began the task of transferring bunches of flowers to 2,500 cardboard boxes for despatch to members and officials of public bodies all over the country.

To Colonize Palestine

Canadian Zionists Subscribe to Large Funds for This Purpose. Plans for the colonization of Palestine and for the restoration of the native land to the Jews met with unanimous approval of the delegates who attended the 21st convention of Canadian Zionists in Winnipeg.

The situation in Palestine, conditions as they are today and as they were half a century ago were vividly told to the delegates by M. Ustahin, chairman of the world national group for restoring Palestine to the Jews, and other noted speakers at the concluding session of the convention. A million dollar fund is being collected for the purchase of land in Palestine and the total contribution more than \$300,000, the quota set for the Canadian Zionists was subscribed. Mr. and Mrs. J. J. Friedman, of Ottawa, chairman of the Canadian, and president of the Hadsahim, the women's organization, respectively opened the fund with a subscription of \$50,000.

Is Still to Come

Day Of Farmer Has Not Passed in Canada

Eventually Canadians and especially those born and raised outside the big manufacturing centres, will realize that modern industry has its ups and downs, and the high wage of one year may be followed by mass starvation the next. It is then that the wanderer turns to the farmstead and probably does not find it so easy to stir a rapid road to fortune, but at least he has independence and, with few exceptions, he is not worried about the means of livelihood in the future.

Shelley the poet, so enjoyed watching the progress of a paper boat on a stream that he is said to have fashioned one from drift wood and on one occasion he had no other material.

Almost any one will take your advice, but one out of a hundred will generate faith enough to use it.

The important event in many a man's life is an accident—the accident of birth.

About the only way to convince a countryman that he is wrong is to agree with him.

W. M. U. 1296

Weird Trip On Mountains

Hazards of Mountain Climbing in District Near Jasper

Three first ascents of peaks in the 13,000 foot class and the opening up of a new route to one of the 12,000 foot class peaks of the great Columbia range, all accomplished in 36 hours of arduous climbing, much of it at night, under dangerous icy and snow conditions, and bitter cold, using lanterns and flashlight to guide them, is the record set up by Alfred J. Cathelineer, Jr., and guide Pulver, members of the American scientific party which will explore the Columbia ice-field, "Roof of the Continent," this summer.

Word of the success of this arduous adventure was sent to Jasper by courier from the edge of the Columbia ice field, as the party rested here playing once more the usual lutes of this practically unknown area.

Rates, Ostheimer and Hans Pulver, one of the guides, undertook one of the wildest trips in the annals of the Canadian mountain climbing, reaching the edge of the Columbia ice-field in a blizzard, and climbing the North Peak, 13,000 feet, the third peak in the range.

Marching all night, they made a successful ascent of Mount Smith, 13,770 feet, and in danger of frost if they stopped, plunged on and went by lantern and flashlight over the breaking ice-field.

At 2:10 a.m. they reached the summit of Mount Kitchener, 13,500 feet, crossing the Dome, 13,540 feet at 4:10 a.m. and on back to camp, after 36 hours steady climbing.

Strange Tribe Found

On Madagascari Island

Have Peculiar Customs Says Leader of Field Expedition

Strange Madagascari tribesmen, some of whom never bathed or washed their bodies, who sleep on carved wooden pillows and who live largely on a diet of sour milk, have been found by Dr. Ralph Linton, leader of the Canadian-Madagascar Expedition to Madagascar for the Field Museum.

These Antandaro and Mahafy tribesmen, Dr. Linton found during a sojourn among them, follow a curious custom of soaking their clothing in grease. He discussed their strange characteristics in a report made public by the Museum.

Dr. Linton, who has been living on the island since January, 1931, in the confidence of the tribal chiefs, has obtained a collection of wooden pillows and has made photographs of some of the most sacred ceremonies of the tribes.

He believes himself to be the only white man ever to have witnessed the sacred ceremony of cleansing the tombs of kings, which is an annual event by the tribesmen in the mountains.

His report spoke of the apparent wealth of the tribes. "Many of the women taking part in the ceremonies wore necklaces of clear glass beads and rings of gold jewelry," he wrote.

Head-bashing is practiced, the heads of enemies being taken as trophies and suspended from a rack outside the villages.

New Industry Is Thriving

North Carolina Man Is Growing Bait For Fishermen

All the prairie of the departments of agriculture both in the United States and Canada may not be deserted after all. They seem to have missed telling the farmers a lot of opportunity is in the fishing industry that may bring large results.

The new crop reported in detail in the report is the growing of worms and minnows as bait for fishermen who have neither time nor inclination to grow them for themselves.

The business, now a little over a year old, has been declared an entire success. So far there appears to be no test-bait for the scientific production of bait but this pioneer producer has worked out, nevertheless, a technique which produces satisfactory results.

Large pens have been built and a couple of dirt beds furnish the home for the worms, while a large pool of water always filled with minnows. It takes special food for both varieties of bait. "I have protected them against the big wharf rats, for they may have with the worms if they let them into the beds," declared Mr. Smith. "I have also prepared a place for the worms to keep from freezing in winter, which I have attended more than twenty hundreds of during the spring," he explained.

Makes Remarkable Statement

Armstrong Says Russian Ambassador Who Died in London During War But Unburied

In his fascinating reminiscences of court life and celebrations, Mr. Percy Armstrong has written a statement about Count Benckendorff, the late Russian Ambassador, who who died in London during the war. Ambassador's vision details 'also place while attached to a foreign court are sent home, with appropriate escort in a battalions, and the observance of this ceremonial has always been jealously regarded.

Count Benckendorff's death put the British Government in a quandary. While the war was on he could not be sent home, and it was decided that he could not be buried in England, but must await return to his own country with proper ceremony at the end of the war. The body was temporarily deposited in Westminster Cathedral, and the only person actually buried there is his father, the late Cardinal Vaughan.

Reviewing the past half year President W. J. Park of the Fraser Valley Milk Producers' Association, B.C. reports that June promises to beat all previous records since the organization was started as the butterfat handed by the association in that month will reach nearly half a million lbs.

How He Did It

A western editor retired the other day with \$100,000. He worked hard, helped people, sponsored worthy causes, and was a good citizen. He was a good citizen, and then found out in his back yard.

Premier's Daughter Visits Canada

Mrs. Maude Hamilton Whitley, daughter of the late Hon. Stanley Baldwin, Premier of Great Britain, photographed at Winnipeg during her recent trip across Canada. She was accompanied by her husband, now in Chinese waters.

M. D. MURPHY

Terminal Passenger Canadian National Railways, Winnipeg, who is transferred to Hornepoint, Ont.

Relief For Ex-Service Men

Important Changes in Regulations

Are Announced From Ottawa. Important changes in regulations of the soldiers' civil re-establishment department are announced by Dr. J. H. King. Covering a wide variety of subjects, the changes will advantageously affect a considerable number of ex-service men, remove certain grievances and provide, in part, at least, for the future of those who through no fault of their own, find themselves in need during their declining years, the department states.

The last Post Fund will be assured sufficient federal assistance to give honorable burial to any Canadian ex-soldier dying in indigent circumstances and otherwise coming under the regulations of the fund.

Many of these regulations have been presented to the government by various veteran organizations asking for extension of terms of the pensions act. Many of these regulations have been complied with and a number are now under consideration.

A special committee has been appointed by the department of justice for the revision of all statutes. This committee will report as to the possibility of handling the revision of the pensions act and if it does not consider it possible then the Government will consider the appointment of a special committee for that particular purpose.

Canada Rich in Minerals

Canada now possesses some of the greatest mineral deposits in the world. These include the wonderful deposits of iron, copper, nickel, lead, zinc, silver, and gold. The Pin-Fin in Manitoba, with its reserves approaching \$100,000,000; the bulwark, the greatest lead zinc deposit yet uncovered, and the new gold discovery on the Ingukuk River, northeastern British Columbia, are only a few of the many rich veins in Quebec, which carries copper values higher than any others so far found.

Canada Is Appointed

Dr. B. T. Dickson, professor of botany at McGill university, Montreal, has been appointed by the Commonwealth Government as chief mycologist of the council of scientific and industrial research, Australia.

London Is Port

London, Ontario, has now an all harbor. Through efforts on the part of the chamber of commerce an ideal air-dock site has been taken over, and within a month's time, will be completely equipped and marked so as to provide an air depot available to all planes that seek London as a stopping place.

Canada's trade with the Orient is steadily increasing, nearly doubling in four years.

Comets Baffle Astronomers

Laws That Govern These Bodies Are Still a Mystery

Comets are strange bodies that baffle even the minds of those beholding the huge telescopes in the observatories. Travelling at a dizzy speed they rush toward the sun, travel around it, and then return to the distant spaces from which they came.

Edmund Halley, an English astronomer, began studying the orbits of comets, and in 1682 he discovered that the comet then visible would return in 1758. When in December of that year the comet did reappear, scientists realized that Halley had made an extremely important contribution to the study of comets, and this particular one was named after him.

With Halley's computations the study of comets was rendered infinitely more simple than it had been previous to his time. There still remains the question as to how these swift travellers begin their journeys and what their significance may be to a universe governed by inexorable laws. Scientists have yet to discover the constant seldom, if ever, in England two towels for each person are placed as a matter of course; in Ireland one; in Germany three. A bedchamber is not furnished with towels and a bowl of sand are supplied. The sand, too, appears in very good class hotels in Spain.

A water bottle is also a controversial matter. It completes the furnishing of the bedroom in England; in Ireland it is not furnished with towels and a bowl of sand are supplied. The sand, too, appears in very good class hotels in Spain.

Wheat Pool Agency For South America

Western Canadian Wheat Pool Will Establish Selling Agency in Argentina

W. J. Jackson has been appointed resident representative in the Argentine for the selling agency of the three Western Canadian wheat pools. He will leave for his new field of work early in September and will have his headquarters in Buenos Aires.

The appointment is the outcome of a scouting trip that Mr. Jackson made to South America last year for the purpose of inquiring into the general conditions of the wheat trade in that country. It has since been decided by the wheat pools to be permanently represented there and while the office will be of a somewhat experimental character it is intended to give it a thorough trial, in expectation of the two countries coming into export and import of wheat.

Experiments Will Determine Its Benefits to Plant Life

Vitisgals, which admit the violet rays of the sun, is to be tested to its benefits to plant life, at University College, Southampton, England, and at Kew. At Kew one-half of an experimental greenhouse will be devoted to vitisgals, and the other half with ordinary glass. A typical section of flowers will be duplicated in each section, while a similar course will be followed with a wide variety of plants, including radishes, cucumbers and beans. A large glass corridor with a southern exposure is it is hoped to discover whether any advantages, such as earlier cropping, better quality, hardiness, better color, harder constitution, and greater resistance to disease, are obtained by the use of vitisgals.

New Sport In Belgium

Long-Distance Drumming Has Become Popular With Miners

Long-distance drumming is a new sport in Belgium, and there is strong competition as to who has the strongest legs and arms. A 25-year-old Poulet drummer in the Walloon district recently won a wager that he could drum a distance of 25 miles, without stopping and without ceasing to beat his drum except for an hour for luncheon. A second drummer, named Robillard, aged 59, then made a drumming journey from Mons to Ath and back, covering 34 miles in 11 hours. Then a drummer of Mauges stepped the 40 miles to Brussels and return to the beat of the drum. The competitors are popular among workers, especially miners.

As Do The Romans

The Experienced Traveller or Tourist Adopts Himself to Conditions

The hapless traveller is he who can adapt himself to the customs of the country in which he temporarily sojourns. Many Americans in France become so used to that nation's customs that they cannot without considerable trouble get ham and eggs and coffee and cream for their breakfast. People who are not fond of porridge, or who denounce Spain and all its cookery, but the experienced traveller or the tourist does so to do people among whom he finds himself. He serenely bids undisturbed with a petty fit of irritation at alien surroundings, he gets the most enjoyment possible out of his journey. — New York Herald-Tribune.

Premier's Daughter Visits Canada

Mrs. Maude Hamilton Whitley, daughter of the late Hon. Stanley Baldwin, Premier of Great Britain, photographed at Winnipeg during her recent trip across Canada. She was accompanied by her husband, now in Chinese waters.

Believed Oldest Inhabitant

Believed to have been the oldest inhabitant of Canada, Chief Thicket, of Saulteaux Indian extraction, is dead at the Jackman Indian Reserve near Lake Winnipeg at the age of 100. He had been a full-time soldier in his earlier life. He was the widow of Chief Thicket, who before his death many years ago, played an important part in the Christianization of the Saulteaux Indians.

Queer Service In

Continental Hotels

Traveler Tells of Experiences in Different Countries

Arrived at a big hotel in Athens some time back. I booked my rooms and was shown into my bed room. There were no clothes on the bed, no keys to the drawers, no towels for washing, no soap, no water to hold water. I protested that the room was not furnished. I was told that it was. The visitors always brought their own bedclothes, a soap, towels, and they washed in a common wash-up room! So a traveller tells his experiences to the London Daily Mail.

A couple of months ago, this traveller continues, I spent a fortnight in a small hotel on the west coast of Wales. There were enough bedclothes on the bed for a trip to the North Pole. There was a key for every drawer, plenty of soap, towels and water. There were brushes, combs, pins, safety razors, hairpins, needles, cotton, candles and matches.

In England the hotels supply soap on the continent seldom, if ever, in England two towels for each person are placed as a matter of course; in Ireland one; in Germany three. A bedchamber is not furnished with towels and a bowl of sand are supplied. The sand, too, appears in very good class hotels in Spain.

A water bottle is also a controversial matter. It completes the furnishing of the bedroom in England; in Ireland it is not furnished with towels and a bowl of sand are supplied. The sand, too, appears in very good class hotels in Spain.

Wheat Pool Agency For South America

Western Canadian Wheat Pool Will Establish Selling Agency in Argentina

W. J. Jackson has been appointed resident representative in the Argentine for the selling agency of the three Western Canadian wheat pools. He will leave for his new field of work early in September and will have his headquarters in Buenos Aires.

The appointment is the outcome of a scouting trip that Mr. Jackson made to South America last year for the purpose of inquiring into the general conditions of the wheat trade in that country. It has since been decided by the wheat pools to be permanently represented there and while the office will be of a somewhat experimental character it is intended to give it a thorough trial, in expectation of the two countries coming into export and import of wheat.

Experiments Will Determine Its Benefits to Plant Life

Vitisgals, which admit the violet rays of the sun, is to be tested to its benefits to plant life, at University College, Southampton, England, and at Kew. At Kew one-half of an experimental greenhouse will be devoted to vitisgals, and the other half with ordinary glass. A typical section of flowers will be duplicated in each section, while a similar course will be followed with a wide variety of plants, including radishes, cucumbers and beans. A large glass corridor with a southern exposure is it is hoped to discover whether any advantages, such as earlier cropping, better quality, hardiness, better color, harder constitution, and greater resistance to disease, are obtained by the use of vitisgals.

New Sport In Belgium

Long-Distance Drumming Has Become Popular With Miners

Long-distance drumming is a new sport in Belgium, and there is strong competition as to who has the strongest legs and arms. A 25-year-old Poulet drummer in the Walloon district recently won a wager that he could drum a distance of 25 miles, without stopping and without ceasing to beat his drum except for an hour for luncheon. A second drummer, named Robillard, aged 59, then made a drumming journey from Mons to Ath and back, covering 34 miles in 11 hours. Then a drummer of Mauges stepped the 40 miles to Brussels and return to the beat of the drum. The competitors are popular among workers, especially miners.

Rapid Progress Of Post Office

Transatlantic Messages in Canada During Past Sixty Years

Probably the growth of the Dominion in the past sixty years cannot be told in any more graphic form than that which the Post Office Department has employed in a series of posters headed "Post Office Progress." One poster says that in 1867 the department handled 37 million letters and in 1927 the total had reached 1,575,974,000. Another says that in the same period the number of parcels handled has jumped from 15,000 to 4,000,000. Letters to Great Britain in 1927 totalled 900,000. This year they will total in round figures 3,000,000. It doesn't take much imagination to see the growth back of these simple figures and to realize the tremendous increase in national business by that time.

Another simple legend will tell all other poster tells a different side of the story. Back in the days of Confederation it took five weeks for a letter to travel from Montreal to Victoria. Today a letter makes the trip in five days. In those days there were no transatlantic cables. Great Lakes and the Rocky Mountains. Today there are 3,400 in the same territory. An outstanding feat of the post office is the fact that the C.O.D. parcel post system. This was inaugurated in 1923, and last year a total of 1,575,974 parcels was handled by the department, indicating that Canadian people are quick to take advantage of any new public service on modern young nation.

The following summary tells in brief the progress of the postal department: 1868, Post Office Savings Banks inaugurated; 1871, postcards introduced; 1874, first heliograph cable; 1875, first airmail; 1876, special delivery system introduced; 1892, two-cent postage for airmail; 1893, first airmail; 1894, parcel post; 1921, insurance of parcel post; 1922, C.O.D. service introduced; 1925, Canadian letter rate reduced to one cent; 1926, war stamps; 1927, war stamps removed from letters. This group of dates and events, while perhaps a little dry, tells a story of progress on modern young nation can well pride itself.

The Price of Bureaucracy

Huge Annual Expenditure of the United States Government

Our bureaucratic type of government is not only an enormous waste of money, but it is also a source of the general rights and liberties of the individual, but the more of government employees and payroll statistics is steadily growing. James A. Emery, counsel to the National Association of Manufacturers, recently stated the situation graphically in a speech before the House of Representatives.

Years will the first of March the production and services of the nation are absorbed by its government.

One-fourth of the cost of the nation's output is absorbed by the government. The cost of the government is not only an enormous waste of money, but it is also a source of the general rights and liberties of the individual, but the more of government employees and payroll statistics is steadily growing.

James A. Emery, counsel to the National Association of Manufacturers, recently stated the situation graphically in a speech before the House of Representatives.

WEDDING

LINDRUM-PEMING
A quiet but pretty wedding took place at the home of Mrs. G. H. Brubaker, in Duchesne, on Tuesday, July 13th, when Miss Grace Fleming, of Bassano, became the bride of Mr. Louis Lindrum, of Duchesne. Miss Elizabeth Sheldrake was the maid of honor, and William Sheldrake supported the groom. The ceremony was performed by the Rev. Mr. Moore, of Brooks.

The happy young couple left after the ceremony to spend their honeymoon in Banff.

Beery, Hutton
A Scream Team

Pair of Comedians Star in Comedy of the Navy

The most humanly comic picture to have its incentive in the tragedy of war.

That is one of the laudatory messages responsible for Paramount's latest effort to bring the "comedy" aspect of life of the American soldier to the screen. "We're in the Navy Now," which is showing in the Gem theatre Friday and Saturday this week, July 22 and 23, is the result.

From sickbeds in drenched war veterans' hospitals came hundreds of similar notes to Wallace Beery and Raymond Hutton following their initial "Behind the Front" effort. These bed-ridden heroes were among the enthusiastic champions of the doughboy pair in that picture. They lauded it by saying that it was responsible for having brought "the one ray of sunshine which lifted them above the thoughts they try so hard to submerge" and by calling it "the funniest film ever flashed on a screen."

In their second effort to depict the war's sunny side, both Beery and Hutton felt they had a distinct responsibility.

"These letters from the boys many of whom will never leave their sickbeds, were the most touching messages of encouragement we have ever received," the stars of "We're in the Navy Now" assure. "It is to them that we feel our picture should rightfully be dedicated."

As the greatest gods that ever crossed a gangplank, Beery and Hutton find the world war a confusing mixture of spectacular sea battles, "kitchen" politics, international intrigue, routine duty and shore leave. Now they wallow through it all in utter bewilderment, caricatures the most hilarious war history yet filmed.

FLY X-IT

One application of FLY X-IT keeps Flies and Mosquitoes off Animals for several days, as proven by numerous Enthusiastic Dairymen's Testimonials

McCormick Twine
The Big Ball

\$14.50 per 100 lbs.

Does not injure skin or irritate the eyes.

One application is equal to many sprayings of other makes.
